

2025 ECU SPRING PHARMA CONFERENCE

6TH ANNUAL

June 3-4, 2025

The annual **ECU Spring Pharma Conference** offers two days of information sharing, topical discussions, and networking with fellow pharma professionals. Contributors include regional subject matter experts, vendors, sponsors, and invited speakers.

The event provides a national conference atmosphere while leveraging lower cost, time, and travel commitments to allow more eastern North Carolina pharma professionals to participate and find impact.

In addition to the general program, attendees can choose between 24 presentations delivered in smaller breakout sessions. The technical program is divided between **Laboratory** and **Manufacturing** tracks which are each split into Pharmedamentals and Advanced topics to engage all career stages. Topics are intended to support the interests of companies in the Biopharma Crescent region of eastern North Carolina including small molecule and biopharma applications.

Lab

Pharmedamentals: Designed for early-career professionals to supplement the practical knowledge used daily with a broader understanding of their role in the pharmaceutical industry and address the “why” behind common pharma approaches.

Manufacturing

Advanced: Designed for experienced professionals to discuss industry hot topics such as new guidance documents, quality best practices, and regulatory trends as well as benchmarking and networking with colleagues from other companies.
